4TH INTERNATIONAL GEOSCIENCE CONFERENCE

Dili, Timor Leste – the Instituto do Petróleo e Geologia – Instituto Público (IPG) Timor Leste is pleased to announce the upcoming 4th IPG International Geosciences Conference on “Timor-Leste Geological Resources Data and Information for Economic Diversification and Development”:

When: 23-26 October 2018

Where: Xanana Conference Room, Ministry of Finance Building, 1st Floor, Aitarak Laran Dili, Timor Leste.

The conference aims to bring together both national and international scientists in the area of geology, petroleum, mineral, geological hazards (earthquake and tsunami; landslides; groundwater) and also to embracing geological research group to paving the way geological data and information are genuinely utilized for economic diversification development purpose.

The main Topics for the technical sessions of the conference are as following:

- Governing geological resources for Timor-Leste development –what we have or get produced, where, when and why?
- Geological survey data and information for economic development of the country.
- The sustainability of geological resource management
- and economic development and the volatility of geological resource and geo-hazards

The event is expected to be open by H.E. Francisco Guterres Lu-Olo, President of Republic Democratic of Timor Leste, accompanied by national and international geological experts,

Instituto do Petróleo e Geologia – Instituto Público (IPG)

and including relevant stakeholders such as international agencies, embassies in Timor Leste, private entities, academia, IPG and the media.
