

FIELD STUDY EXECURSIONS PETROLEUM MANAGEMENT & PETROLEUM ENGINEERING STUDENTS DILI INSTITUTE OF TECHNOLOGY (DIT) SUAI 4 – 8 MARCH 2019

Made possible with generous support from **INSTITUTE OF PETROLEUM AND GEOLOGY (IPG)**

DILI INSTITUTE OF TECHNOLOGY (DIT) STUDENTS

Total of 63 students of Petroleum study, composes of students from Petroleum Management and Petroleum Engineering mostly from academic year 2017 involved in field study excursions as part of their academic requirement.

FIELD STUDY EXECURSIONS PURPOSES

- Enhance students understanding of geoscience in particular in the area of Petroleum and Gas.
- Expose, engage and visual observation of students on Petroleum and Gas seep, abandoned oil and gas well and contamination in the selected area of Suai.

INSTITUTE OF PETROLEUM AND GEOLOGY (IPG) PARTICIPATION

- Provide its geoscience expertise in particular in the area of Petroleum and Gas.
- Promote and enhance students understanding of IPG works in the area of Petroleum and Gas investigation.

FIELD STUDY EXECURSION HIGHLIGHTS

Day 1 - 6 March 2019, Visit to *oil seeps* Matai & Abandoned well (Matai 5)

Day 2 - 7 March 2019 – Visit to two contaminated community water well at observation point, Suai Villa.

Day 2 - 7 March 2018 Discussion and evaluation of students field observation on Day 1 & 2)

Provide basic geological structure, basic concept of how oil formed, rock description and oil production equipment at observation point - oil seeps Matai & Abandoned well (Matai 5).

Provide basic information and visual observation of two contaminated water well at observation point- Suai Villa

Students field and visual observation of abandoned well at Suai Loro and Tafara river.
